Orthopedic Nursing Symposium

MONDAY, OCTOBER 3, 2016
8 AM – 4 PM

HOAG HOSPITAL IRVINE AUDITORIUM
16200 SAND CANYON AVE.
IRVINE, CALIFORNIA 92618
Who Should Attend

This program is designed for orthopedic nurses, peri-operative staff and clinicians working in the orthopedic setting interested in learning more about topics related to musculoskeletal issues.

Continuing Education Hours

This program has been provided by the Orange County Chapter of the National Association of Orthopedic Nurses (NAON) which is approved by the California Board of Registered Nursing with provider number CEP5753 for seven (7.0) contact hours for RNs.

Acknowledgement

This event is supported by orthopedic related exhibitors and registration fees. At the time of printing, a complete list of program exhibitors was not available. Appropriate acknowledgement will be given to all exhibitors at the time of the program.
**Educational Objectives**

By the completion of the course, the participant should be able to:

- Explain how pelvic parameters of sagittal balance will form an essential part of the evaluation of this new surgical technique for patients with spinal conditions.
- Discuss how surgical management of spinal disorders can make a paradigm shift in patient care.
- Discuss the benefits of an enhanced recovery program for total joint replacement to optimize patient outcomes and improve patient satisfaction.
- Highlight the enhanced recovery program’s pre-operative hydration and in anesthesia management to improve post-op nausea and pain control.
- Describe different options in hip arthroplasty surgery.
- Discuss safe methods of assisting patients with activities of daily living and mobility after an anterior hip arthroplasty.
- Recognize anterior hip arthroplasty surgical approaches and post-operative considerations for patient care.
- Describe regional anesthesia techniques used for nerve blocks for pain management.
- Differentiate between an adductor canal block and femoral nerve block and discuss nursing considerations with each modality.
- Discuss different surgical approaches for shoulder surgery.
- List 2 nursing interventions to implement with a patient who has undergone a total shoulder replacement.
- Identify the symptoms and structural pathology of malignant primary bone tumors.
- Discuss the treatment strategies and nursing considerations for a patient with osteosarcoma.
- Examine best practices for Hana table manipulation during anterior hip procedures.
- Recite how use of a team approach impacts safety in patient positioning using the Jackson Trios and Hana tables.
- State one key process of how an orthopedic implant is manufactured.
- Identify key elements in creating an orthopedic surgical team for innovative surgical techniques.
